grains

vegetable oils

feed ingredients

fertilisers

Markets we serve

Europe · Asia · Africa · Middle East · Americas

From enquiry to delivery

- 1. Request** – You send us a request: product, required quality parameters, indicative volume, destination and preferred delivery basis. Our managers speak all major European and Asian languages, so you can write in your own language.
- 2. Offer and specification** – We prepare a commercial offer and a product specification, agreeing parameters with the producer where needed. We look for the optimal price-to-quality ratio for each cargo.
- 3. Contract** – The parties fix the specification, quantity, delivery basis under Incoterms 2020, and the inspection, payment and dispute resolution procedures. Depending on the product, contracts may follow the standard forms of GAFTA (grains, feed) or FOSFA (oils and oilseeds).
- 4. Shipment and inspection** – Independent inspection of quantity and quality is typically carried out at loading. We ship by sea, rail and multimodal routes; packaging – bags, big bags or bulk, flexitanks for oils.
- 5. Documents and payment** – The document set usually includes a commercial invoice, a transport document (e.g. a bill of lading), certificates of origin, quality and weight, and a phytosanitary certificate. We offer secure transaction and payment solutions, including for cross-border operations.

Discuss your supply requirements

Send your product specification, volume and destination. We will prepare a commercial offer and discuss the available supply options.
